AB	Lysozyme (I) is modified by aminocarbonylation with guar gum hydrolyzates, which are prepared by hydrolyzation of the polysaccharide with galactomannase and/or cellulase, for the preparation of bactericides having excellent emulsifying capability and bacteriostatic activity. The bactericides are useful in food ., pharmaceuticals, cosmetics, etc. The method is lower in cost than the prior art which uses dextran instead of guar gum hydrolyzates. Moreover, the modified I retains .apprx.80% bacteriolysis activity of I, as compared to 32% for that of the prior art.		
ST	lysozyme modification guar gum hydrolyzate bactericide; emulsifier lysozyme modification guar gum hydrolyzate		
IT	Bactericides, Disinfectants, and Antiseptics Emulsifying agents (lysozyme conjugated with guar gum hydrolyzates for preparation of)		
IT	Carbamoylation (lysozyme guar gum conjugates preparation by, as bactericides having bacteriostatic activity and high emulsifying capacity)		
IT	9000-30-0D, Guar gum, conjugation products with hydrolyzates of RL: BIOL (Biological study) (for preparation of bactericides having high emulsifying capacity)		
IT	9004-34-6, Cellulose, biological studies 50812-17-4, Galactomannanase RL: BIOL (Biological study) (guar gum hydrolyzed with, for preparation of lysozyme conjugate as bactericides having high emulsifying capacity)		
IT	9001-63-2DP, Lysozyme, conjugated with guar gum hydrolyzates RL: PREP (Preparation) (preparation of, as bactericides having high emulsifying capacity)
